

HL4 Cumulative Task Graph Through Training Batch 4

Terminal snapshot c54976a9f0fe4229a4652ceb6b43145b | 20260711-200650-hl4-train-langchain-graph-batch4-rerun1 | 18 nodes, 38 directed edge records

Node family Finance Production Risk HWPX I&F alias **Edge weight** thin 0.40–0.60 medium 0.65–0.80 bold 0.85–1.00

Reading the figure. The topology view coalesces parallel source-target records where they overplot. The following registry retains the full source, target, relation, and numeric weight for every one of the 38 directed edge records.

Edge Registry

Exact directed edge records in the batch-4 terminal snapshot

#	Source	Target	Relation	Weight
1	Datacenter rollforward	Datacenter refills	transfer logic and structure	0.40
2	Datacenter refills	Capacity task 2	transfer inventory rollforward logic	0.55
3	HWPX supplier contacts	HWPX safety audit	transfer HWPX XML manipulation logic	0.85
4	Datacenter refills	Hospital staffing	transfer capacity planning logic	0.65
5	Capacity task 2	Hospital staffing	transfer inventory replenishment logic	0.50
6	Datacenter rollforward	Transit rollforward	transfer Excel reconciliation structure	0.85
7	Datacenter refills	Transit rollforward	transfer rollforward logic	0.60
8	Capacity task 2	Factory output at risk	transfer production metrics logic	0.75
9	Datacenter rollforward	Factory output at risk	transfer Excel formula mapping	0.60
10	Factory output at risk	Campus energy balance	transfer advanced Excel formula mapping	0.85
11	Factory output at risk	Campus energy balance	transfer weighted aggregation logic	0.90
12	Campus energy balance	Campus budget at risk	transfer lookup and mapping logic	0.95
13	Factory output at risk	Campus budget at risk	transfer statistical aggregation logic	0.90
14	Campus budget at risk	Hospital bedflow	transfer identical spreadsheet workflow	0.98
15	Factory output at risk	Hospital bedflow	transfer template formula mapping	0.90
16	Datacenter refills	Maintenance restock	transfer inventory replenishment logic	0.75
17	Transit rollforward	Maintenance restock	transfer Excel standard structure	0.85
18	Factory output at risk	Campus energy balance	transfer Excel lookup and statistical logic	0.90
19	Capacity task 2	Factory output at risk	transfer production metric logic	0.75
20	Datacenter refills	Transit rollforward	transfer financial rollforward logic	0.70
21	Capacity task 2	Capacity task 4	transfer capacity schedule logic	0.95
22	Hospital staffing	Capacity task 4	transfer threshold detection logic	0.75
23	Transit rollforward	Media rights rollforward	transfer Excel reconciliation structure	0.95
24	Datacenter refills	Media rights rollforward	transfer ledgers reconciliation logic	0.75
25	Capacity task 2	Capacity core 36	identical capacity planning logic	1.00
26	Hospital staffing	Capacity core 36	transfer threshold event tracking	0.70
27	HWPX safety audit	HWPX clinic intake	transfer HWPX XML processing logic	0.90
28	HWPX supplier contacts	HWPX clinic intake	transfer data normalization logic	0.70
29	Hospital staffing	Maintenance restock	transfer inventory replenishment logic	0.80
30	Datacenter refills	Maintenance restock	transfer replenishment scheduling logic	0.75
31	Capacity core 36	Capacity task 8	identical capacity planning logic	1.00
32	Hospital staffing	Capacity task 8	transfer threshold event tracking	0.70
33	Media rights rollforward	Datacenter rollforward	transfer Excel reconciliation structure	0.95
34	Datacenter refills	Datacenter rollforward	transfer financial rollforward logic	0.75

#	Source	Target	Relation	Weight
35	Datacenter rollforward	Media rights rollforward	transfer financial rollforward logic	0.80
36	Capacity task 4	Capacity task 4	identical task specification	1.00
37	Capacity core 36	Capacity task 3	identical capacity planning logic	0.95
38	Capacity task 8	Capacity task 3	transfer capacity schedule logic	0.90
